Name and Title (Print): _____

Date: _____

Attachment 1- Agency Response to Vendor Questions

No.	RFP Section/Page Reference	Vendor Question	Agency Response
1.	Section 1.1 and Section 3	What are the expected peak client count and coverage/performance targets, including inside the two metal buildings? Is an inventory or diagram of the existing fiber, switches, access points and available power available?	Peak client count could be in the hundreds when hosting larger events. We do not have a diagram of existing network equipment, but it is located in the concession stand adjacent to the main arena.
2.	Section 3	Does the 802.11g/n/ac/ax/be requirement apply to each access point, and what is intended by switching radios from 2.4 GHz to 5 GHz?	We prefer each access point to have the same required specs. Vendors with older equipment may only have the 2.4GHz option, which led to needing both radios available.
3.	Sections 2.1 and Section 2.2	Please confirm the time zone for the November 4 and November 18 deadlines, any current addenda, and the process for arranging a site visit. We are not requesting an appointment yet.	Our time zone is Eastern Standard Time.
4.	Section 2.5 and Section 4	May a vendor propose only the cabling/installation portion, or must a prime provide the complete Wi-Fi solution with any cabling subcontractor identified?	This RFP requires vendors to submit a complete solution for all listed items.

End of Attachment 1

Attachment 2: Revisions to Vendor's Proposal

1. If applicable, insert revised proposal language below or attach separate document with revised language. Cite section number and page number of revised proposal language.

   Note: This is only required if you are having to update a proposal already submitted
