Covid-19 infections have been increasing across the United States at the fastest rate since the start of the pandemic; more than 30 states are now reporting in excess of 1,000 new cases daily.

An American is testing positive for COVID every 1.2 seconds. COVID-19 cases are surging; one American dies every 107 seconds

North Carolina continues to set troublesome records related to COVID-19. Last Friday, November 6, we recorded 2,908 cases in a single day. This past Wednesday November 11, we recorded 3119 cases for the day.

US COVID-19 cases exceed 144,000 on November 11 while hospitalizations due to the disease surpass 65,000 both are new records; deaths continue to rise. The US has recorded more than 1m new coronavirus cases in just the past 10 days as the national total soared past 10m cases amid a widespread surge. Daily cases for the country have steadily climbed throughout November to record a total of 1,129,463 cases in the last 10 days alone, according to figures from Johns Hopkins University.

COVID-19 DAILY UPDATES

The United States again shattered pandemic records, reporting more than 153,000 new coronavirus cases on November 12 as some 66,000 people were hospitalized nationwide. It was the seventh time in nine days that reported U.S. infections reached new heights. November 13 marks the tenth day in a row, the US has reported more than 100,00 infections. Experts predict we could soon be seeing 200,000 cases per day.

Epidemiologists say the recent records are likely to be surpassed without substantial change in mitigation strategies.

Globally, Johns Hopkins University's coronavirus tracker reported more than 50.2 million COVID-19 cases worldwide as of Sunday, November 8, 2020. There have been more than 1.2 million deaths from the disease since the pandemic started.

The U.S. has approximately 4% of the world's population but represents almost a fifth of all reported COVID cases.

Pfizer released early study results Monday, November 9 indicating their vaccine, prevented more than 90% of infections with the COVID-19 virus. Health Departments and their partners are working on mass vaccination plans.
