The United States on Friday once again saw a record number of Covid-19 cases, when more than 98,500 infections were recorded. It is the fifth time since Oct. 22 that a new national daily case record was set.

Covid-19 infections have been increasing across the United States at the fastest rate since the start of the pandemic, and overnight more than 30 states reported having more than 1,000 new cases.

North Carolina reported a record jump in cases of 2,885 on Thursday October 29, 2020

NEW CASES PER 100,000 DURING THE LAST WEEK
