⚠ Remote security administration

The server mobilesync.emailsrvr.com requires that you allow it to remotely control some security features of your Android device. Do you want to finish setting up this account?

CANCEL   OK

11. Tap **Next**

12. You will be prompted to Activate device administator, tap on **Activate** at the bottom of the screen

< **DEVICE ADMINISTRATOR**

M Gmail

The server mex06.emailsrvr.com requires that you allow it to remotely control some security features of your Android device.

Activating administrator will allow Gmail to perform the following operations:

● **Erase all data**
Erase phone's data without warning, by performing factory data reset.

● **Set password rules**

Control the screen unlock password length and character restrictions

● **Monitor screen unlock attempts**
Monitor number of incorrect passwords entered when unlocking screen, and lock phone or erase all phone data if too many incorrect passwords are entered.

● **Lock the screen**
Control how and when the screen locks

● **Set screen unlock password expiration**
Control how frequently the screen unlock password must be changed.

● **Set storage encryption**
Require stored application data to be encrypted.

● **Turn off cameras**
Prevent use of all device cameras.

● **Turn off functions on lock screen**
Prevent the use of some functions while on the lock screen.
