## North Carolina COVID-19 Metrics

Updated Monday-Friday by the NC Department of Health and Human Services at approximately noon. Last updated 12:35 p.m., Jan. 14, 2022.

*In recognition of the Martin Luther King Jr. Day holiday, NCDHHS will not publish dashboards on Monday, Jan. 17, 2022, and will resume publication on Tuesday, Jan. 18, 2022. The cases demographics dashboard, which is normally updated on Monday will be updated on Tuesday, Jan. 18, 2022.*

*During Dec. 31, 2021 through Jan. 11, 2022, some laboratory results from GENETWORx laboratory were not submitted to NCDHHS. As a result, 36,473 test results (including 10,791 positive results) from this period were not included in data on the NCDHHS data dashboard. This issue did not cause any delays in results being sent to patients or providers. The issue with submission of results from GENETWORx to NCDHHS has been resolved; case and test data reported on Thursday, Jan. 13 will be higher as it will incorporate data that would have been reported on earlier dates.*

**35,759**  
Newly Reported Cases

**31.6%**  
Daily Percent Positive

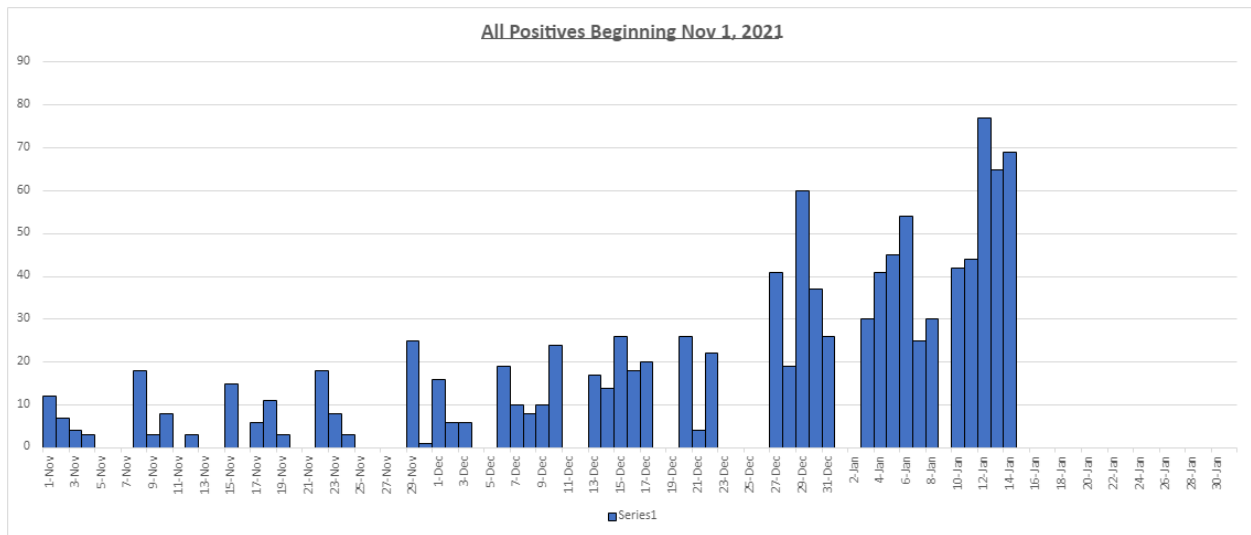

**4,381**  
Currently Hospitalized

**19,903**  
Total Deaths

**74%\***  
Percent of Adult Population  
Vaccinated with at Least One  
Dose

**70%\***  
Percent of Adult Population  
Vaccinated with Two Doses  
or One Dose J&J
